UN GRES PORCELLANATO RESISTENTE E FUNZIONALE. UNA CERAMICA PROGETTATA PER L’OUTDOOR.

RESISTANT AND FUNCTIONAL PORELAIN STONEWARE. CERAMICS ESPECIALLY DESIGNED FOR OUTDOOR USE.
**APPLICAZIONI**  
**POSSIBLE INSTALLATIONS**

- **POSA SU GHIAIA O SABBIA**  
  INSTALLATION ON GRAVEL OR SAND

- **POSA SU MASSETTO CON COLLA**  
  INSTALLATION ON A SCREED WITH ADHESIVE

- **POSA SU ERBA**  
  INSTALLATION ON GRASS

- **POSA SOPRAELEVATA CON SUPPORTI**  
  SUSPENDED INSTALLATION WITH SUPPORTS

Per informazioni più dettagliate sulle applicazioni consultare il manuale tecnico, disponibile in versione cartacea e sul sito internet.

For more further details regarding the applications consult the technical manual. The technical manual is available online as well as in hard copy.
DESTINAZIONI D’USO
INTENDED USES

- **VIALETTI E CAMMINAMENTI**
  - Paths and walkways

- **TERRAZZE**
  - Terraces

- **STABILIMENTI BALNEARI**
  - Beach establishments

- **ARREDO URBANO**
  - Street furnishings

- **PISCINE E ZONE ADIACENTI**
  - Swimming pools and adjacent areas

- **PARCHI PUBBLICI, GIARDINI**
  - Public parks and gardens

- **PARCHI, AREE CARAVANI**
  - Parking areas, transitable areas

- **PARCHI INDUSTRIALI E AD ALTO CARICO**
  - Industrial areas subject to heavy loads

* All exclusions of the acid fluorsilicic are derived. // Excluding hydrofluoric acid and its derivates
** Carrelaibile quando esclusa la massita. La classificazione si riferisce al solo formato quadrato. // Translatable when applied to a square with smooth. The information applies only to square formats.
GREEN MISSION
SANIO SICURO ECOSOSTENIBILE
Cotto d’Este has made a commitment to minimise its environmental impact through concrete action carried out every day. These include investing in the most advanced technologies and making production decisions based on logs of sustainability. Despite being the result of a complex industrial and technologically advanced process, ceramics are a natural product. Following a simple recipe, composed of a few essential elements, such as earth, water and fire, one can obtain a strong, versatile, practical and hygienic product, which has a high value in terms of beauty and design. This is particularly the case if the production chain interacts with the environment in a responsible way by reducing the need for raw materials, recycling water and waste products, using renewable energy and managing the process with high-efficiency systems, thus substantially reducing the carbon footprint that the industrial production leaves on the surface of the planet.

HEALTHY SAFE ECOFRIENDLY
Cotto d’Este has chosen to take a stand in defense of the planet. The company has an on-going commitment to minimise its environmental impact through concrete action carried out every day. These include investing in the most advanced technologies and making production decisions based on logs of sustainability. Despite being the result of a complex industrial and technologically advanced process, ceramics are a natural product. Following a simple recipe, composed of a few essential elements, such as earth, water and fire, one can obtain a strong, versatile, practical and hygienic product, which has a high value in terms of beauty and design. This is particularly the case if the production chain interacts with the environment in a responsible way by reducing the need for raw materials, recycling water and waste products, using renewable energy and managing the process with high-efficiency systems, thus substantially reducing the carbon footprint that the industrial production leaves on the surface of the planet.

Cotto d’Este, through Panariagroup Industrie Ceramiche S.p.A. holding, is a member of the U.S. Green Building Council and of the Italian Green Building Council: two organizations that promote in the U.S. and in Italy buildings that are environmentally responsible, profitable and healthy places to live and work.

SANDI SICURO ECOSSSOSTENIBILE
Cotto d’Este ha scelto di schierarsi in difesa del pianeta. Lo ha fatto e continua a farlo ogni giorno con azioni concrete, attraverso investimenti in tecnologie più evolute e scelte produttive che rispondono a logiche di sostenibilità. Perché in fondo, pur essendo il risultato di un processo industriale complesso e tecnologicamente avanzato, la ceramica è un prodotto naturale. Seguendo una ricetta semplice, composta dai pochi elementi fondamentali come terra, acqua e fuoco, che si può ottenere un prodotto resistente e versatile, pratico e igienico, che ha un alto valore in termini di bellezza e design. Tuttavia, se la catena produttiva interagisce con l’ambiente in modo responsabile: riducendo la richiesta di materie prime, riciclando l’acqua e i rifiuti, utilizzando energie rinnovabili e gestendo l’impianto con sistemi a haute efficacia, si riduce in sostanza l’impronta ecologica che la produzione industriale lascia sulla superficie del pianeta.

HEALTHY SAFE ECOFRIENDLY
Cotto d’Este has chosen to take a stand in defense of the planet. The company has an on-going commitment to minimise its environmental impact through concrete action carried out every day. These include investing in the most advanced technologies and making production decisions based on logs of sustainability. Despite being the result of a complex industrial and technologically advanced process, ceramics are a natural product. Following a simple recipe, composed of a few essential elements, such as earth, water and fire, one can obtain a strong, versatile, practical and hygienic product, which has a high value in terms of beauty and design. This is particularly the case if the production chain interacts with the environment in a responsible way by reducing the need for raw materials, recycling water and waste products, using renewable energy and managing the process with high-efficiency systems, thus substantially reducing the carbon footprint that the industrial production leaves on the surface of the planet.

SANDI SICURO ECOSSSOSTENIBILE
